Main Menu

The Main Menu will always be located at the top left of the window. It includes icons for different tools on the map. Hover over each icon to learn its function.

Search

You can search for a site by Parcel Number or Address. To change the search type, click the search menu dropdown button. Note that the default search is by Parcel Number.

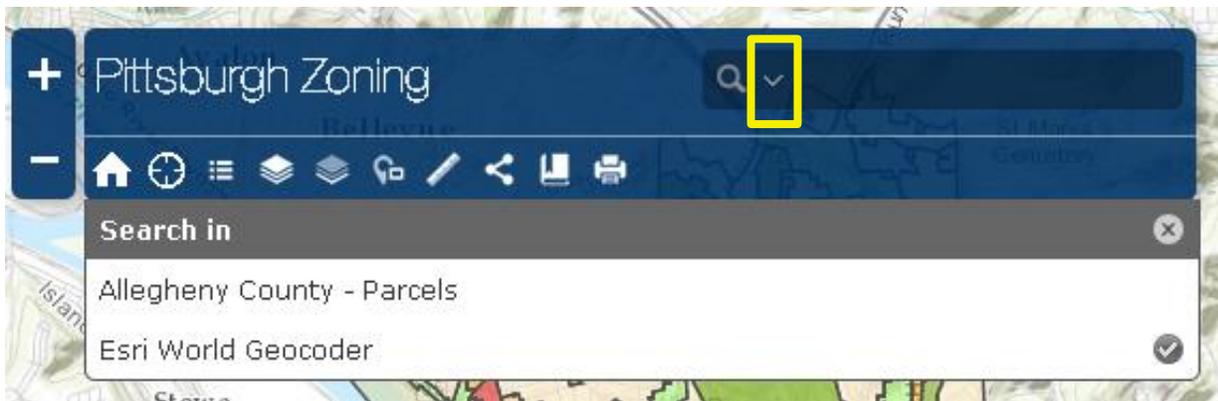

To search by **Parcel Number**, click Allegheny County – Parcels

(Example: the Allegheny Courthouse Parcel Number is 0002E00251000000).

To search by **Address**, click Esri World Geocoder

(Example: the Allegheny Courthouse Address is 436 Grant St).

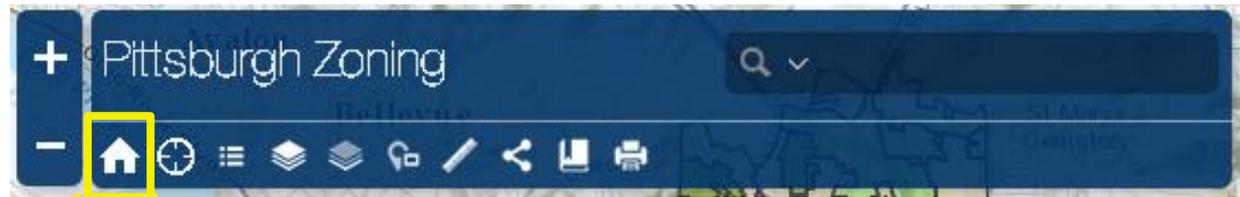

A check mark will indicate your selection.

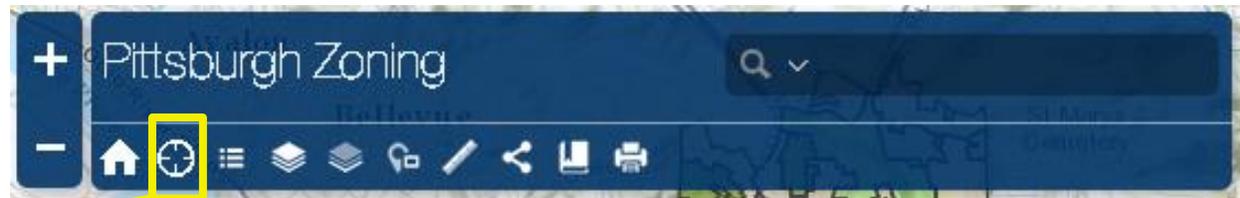

Zoom

 Use the Plus and Minus buttons on the left of the menu to Zoom in or out.

Default Extent

This button will zoom and center the map on the default extent.

Find My Location

This button will show your location. The web browser must have permission to track your location.

Legend

The legend will appear on the right side of the window. Letter and color indicates each zone type.

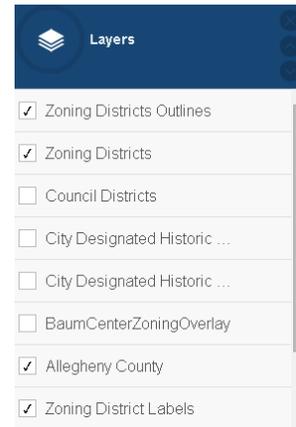

Layers

A checklist will appear on the right side of the window.

Check and Uncheck layers to show on map. Checked layers will appear on map.

Zoning Districts Outlines, Zoning Districts, Allegheny County, and Zoning District Labels are selected by default.

Basemap Gallery

The Basemap Gallery will appear on the right side of the window.

Click on a map type to change the Basemap of your view.

The Topographic basemap is selected by default.

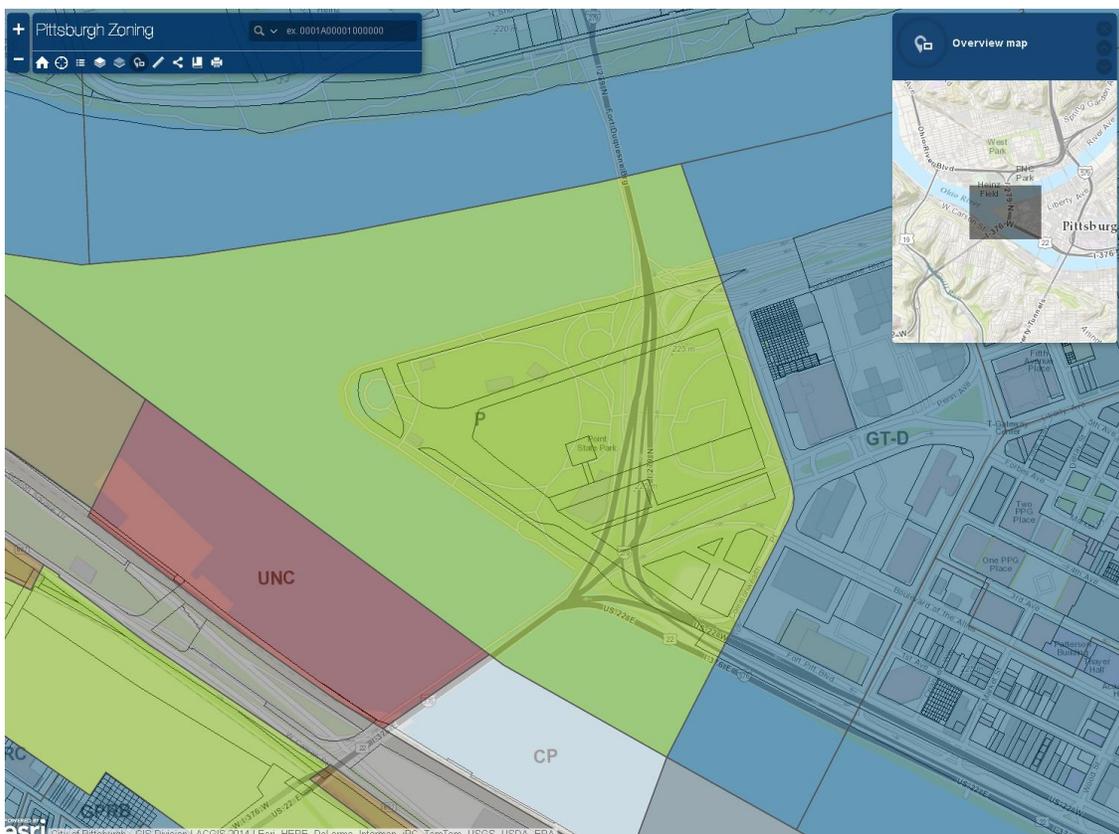

Overview Map

The Overview Map will appear on the right side of the window.

A gray box will appear over a larger map of Pittsburgh. The gray box shows the area currently on display in your screen.

The gray box can be moved across the larger map to display different regions.

Example: Map is zoomed in on Point State Park. The gray box in the Overview Map shows the location in relation to the larger map of Pittsburgh.

Measure

The Measure Tool will appear on the right side of the screen. This includes tools to measure areas, distances, and the latitude and longitude of specific locations.

To measure an area, click the area button, and select the units of measurement from the drop down menu on the right. Then click around the perimeter of the area to measure. Blue lines will mark the perimeter, and the area measured will become a darker color, with the measurement result in the window.

To measure a distance, click the distance button, and select the units of measurement from the drop down menu on the right. Then click along the path to measure. Green points will mark points and blue lines will mark line segments along the path. The measurement will be displayed in the window.

To measure a location, click on the location button and select the units of measurement from the drop down menu on the right. Click the point to measure. The measurement result of the point and the location of the mouse will be displayed in the window.

Example: Point State Park measured area, distance, and location.

Share

The Share menu will appear on the right side of the screen. The menu will give multiple options to share the map. Click on the location for the shared map, copy the map link, or copy the code to embed the map. To ensure that the map appears as you are currently viewing it, check 'Share current map extent'.

Bookmarks

The bookmark window will appear on the right side of the screen. This menu shows **a list of the neighborhoods in Pittsburgh**. Click on any neighborhood of interest, and the map will navigate to and zoom in on that neighborhood.

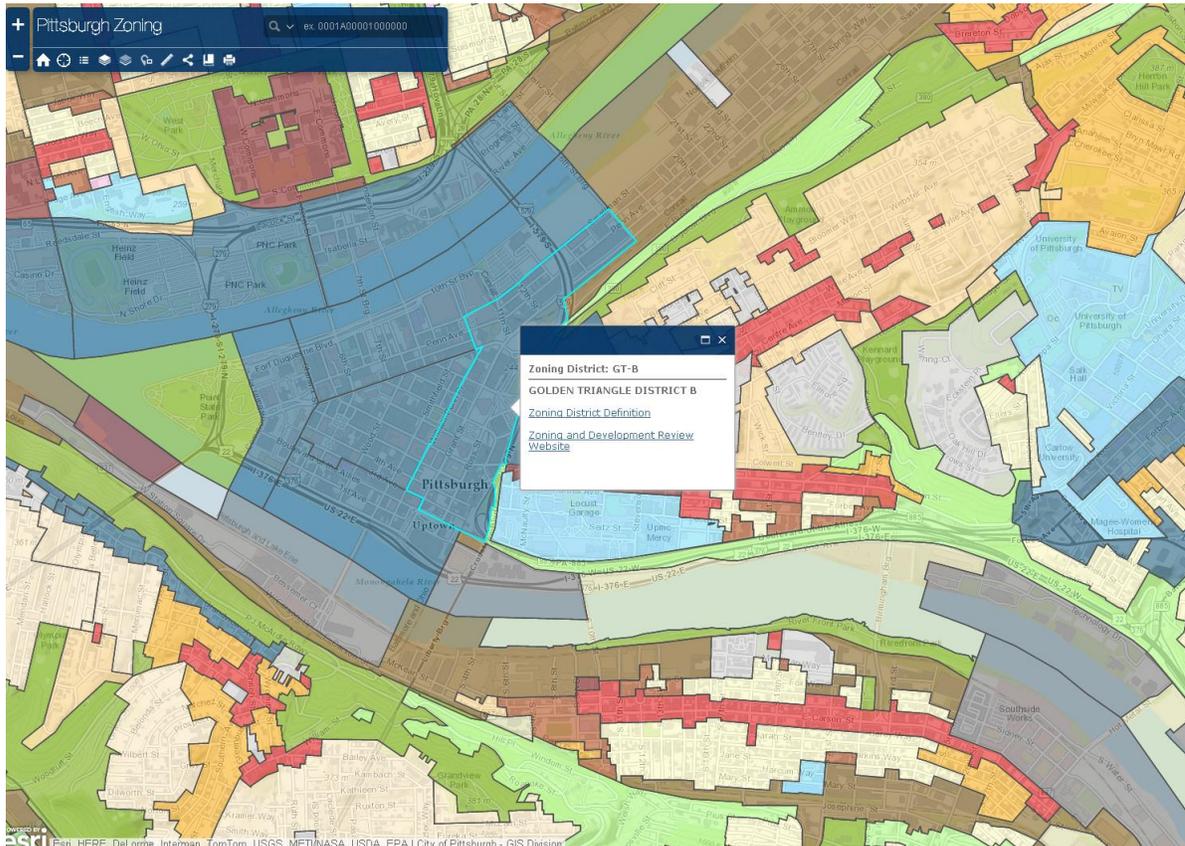

Print

The print menu will appear on the right side of the screen. To include the legend in the printed version, select 'Add legend to output'. Change the format of the printed version in the Print dropdown menu.

Accessing Specific Zone and Parcel Information

Zone

Navigate to location of interest (for example, a part of the Central Business District) and click on that zone.

A dialog box appears. It will include links to the Zoning District Definition and the Zoning and Development Review Website. Links will open in new windows.
