Tony -

As part of the City's new JDE ERP financial system project, the City wants to expand / accelerate the use of Denovo consultants already under contract to the County. Both the Mayor and the City Controller want to replace the current Ceridian outsourced payroll solution with the JDE ERP Payroll and automated time collection systems for the City's 3,300 employees by January 1, 2013. Attached [Not sent to you!] is a 29-page proposed Payroll Services Implementation Plan from Denovo that should deliver the desired payroll solution to the City in tight collaboration with products and services from Kronos. The City expects to be invoiced approximately \$300,000 by the County as a direct time and materials pass through for all Denovo City Payroll Services for:

- Project Management
- Implementation Definition/Discovery/Design
- Configuration and Testing
- Data Conversion
- Interfaces
- Reporting
- Production Cutover from Ceridian to JDE ERP
- Training
- Travel & Living

Separately and in addition, there may be cost recovery needs/opportunities from experienced Allegheny County staff for JDE ERP payroll preparation and Kronos automated time collection system knowledge and services.
