

PWSA/PNG Community Meeting

Upper Lawrenceville Phase 2: PWSA Water Main Replacement Project Peoples Natural Gas Pipeline Replacement Project

WHERE: **AOH**
*5203 Carnegie Street
Pittsburgh, PA 15201*

WHEN: **Tuesday, May 10, 2016**
Starting at 6:30 pm

The Pittsburgh Water and Sewer Authority (PWSA) and Peoples Natural Gas (PNG) will continue collaborative infrastructure improvement efforts in the Upper Lawrenceville area.

PWSA and PNG staff will present the details of the projects with a question and answer session to follow. We invite residents to attend to learn more.

PWSA's Water Main Replacement Project consists of approximately 7,200-linear feet of new 8-inch ductile iron pipe, including service lines, gate valves, and fire hydrants on sections of Carnegie Street, Holmes Street, Duncan Street, Poe Way, Kent Way, Keystone Street, 52nd Street, 54th Street, and 55th Street. The existing 6-inch water main will be cut, capped, and abandoned in place.

PNG's Pipeline Replacement Project consists of approximately 3,600-linear feet of 2, 4, and 6-inch bare steel pipeline replacement with new plastic pipeline and 208 service line renewals on sections of Carnegie Street, Holmes Street, Duncan Street, and Poe Way.

Once construction is complete, PWSA and PNG will share the cost of final paving and restoration on the impacted streets. This collaborative effort on infrastructure improvements limits the construction impact and inconvenience to residents and saves considerable time and money for the organizations and customers.

Residents may notice the preliminary stages of construction beginning the week of May 2nd on Carnegie and Holmes Streets.

If you have any questions regarding the PWSA project, please do not hesitate to contact Construction Project Manager, Tunde Ibrahim at 412.255.2545 or rtunde@pgh2o.com.

If you have any questions regarding the People's Natural Gas project, please do not hesitate to contact Project Manager, Carl Taylor at 412.244.2604 or Carl.Taylor@peoples-gas.com.
