

Maytide Stormwater Project

OVERVIEW - What is happening in your neighborhood?

- In efforts to reduce the risk of flooding and hazardous hillside conditions, as well as improve stormwater and sanitary systems, PWSA will complete the design phase for stormwater improvements near Maytide Street, Sanderson Street, and Merritt Avenue in Carrick and Overbrook neighborhoods of Pittsburgh. [See map on reverse.](#)

SCOPE - What can you expect?

- PWSA will perform infiltration tests, manhole inspections, utility surveys, and stormwater observations in the public right-of-way beginning in February 2018.
- A community meeting will be held during the design-phase of this project to familiarize residents with the project in late Summer 2018.

SCHEDULE - When will this work take place?

- Project preliminary design work will occur from February through October 2018.
- Site investigations by PWSA design team will occur Monday through Friday from 7:00 a.m. to 6:00 p.m.
- Preliminary design completion is anticipated by October 2018.
- Final design completion is anticipated by early 2019.
- Project construction will begin in 2019. Schedule will be updated and dates may change as design work is completed.

FYI - How will your neighborhood be affected?

- During the design phase, some noise from equipment and crews on-site can be expected.
- Temporary lane closures may be required to perform inspections or investigations.
- “No Parking” signs will be placed 48 hours in advance as needed.

Community Coordination

- PWSA will communicate through the office of Councilman Anthony Coghill, community groups, and the Office of the Mayor on this project, which will aid in sharing project updates and receiving feedback. As the design progresses, a community meeting will be held.

PWSA Contact

- Please contact Ryan Quinn, Design Project Manager with questions or concerns at 412.255.8800 ext. 2421, or rquinn@pgh2o.com.
