

2018 Small Water Main Replacements – Hamilton Avenue

OVERVIEW - What is happening in your neighborhood?

- As part of ongoing efforts to address concerns with aging infrastructure, PWSA has developed a small diameter main replacement program.
- This project will replace the waterline on Hamilton Avenue, between N. Dallas Avenue and N. Homewood Avenue.
- **Please see Page 2 for maps.**

SCOPE - What can you expect?

- Replacement of approximately 2,200-feet of existing 6-inch diameter main with 12-inch diameter main.
- The project will occur in phases beginning with survey of the utilities and geotechnical investigations.

SCHEDULE - When will your neighborhood be affected?

- From February through April, survey crews will be out in the community collecting information and conducting geotechnical investigations.
- Future activities will include a community informational meeting and the construction activities required to replace the water main.
- Construction will not occur until early 2019.

FYI - How will your neighborhood be affected?

- Survey crews will be in the area collecting data along the streets and sidewalks.
- Machinery may be on-site to perform test digs and soil borings.
- Traffic is not expected to be disrupted during survey and field investigations.
- There will be no disruption to PWSA water service during this phase of the project.

With whom is PWSA coordinating?

- PWSA is working closely with our community partners and regulatory agencies to complete this project in a timely and efficient manner with the least amount of disruption as possible.
- We are coordinating with regulatory agencies such as PennDOT, Allegheny County, City of Pittsburgh, PADEP, local community groups, and councilman Rev. Ricky Burgess' office.

Who should you contact at PWSA?

- Should you have any questions or concerns, please do not hesitate to contact Bob Hutton, Design Project Manager, at 412.255.8631 or Bhutton@pgh2o.com.
