SCHEMATIC SITE PLAN

UNIVERSITY OF PITTSBURGH HEINZ CHAPEL COURTYARD

The Heinz Chapel donor garden draws inspiration from the tradition of formal gardens paired with Gothic structures. We integrated the following common characteristics into our design:

- Symmetry associated with that of the structure
- Low parterre plantings that do not obstruct views of the structure
- A central focal point, usually in the form of a fountain

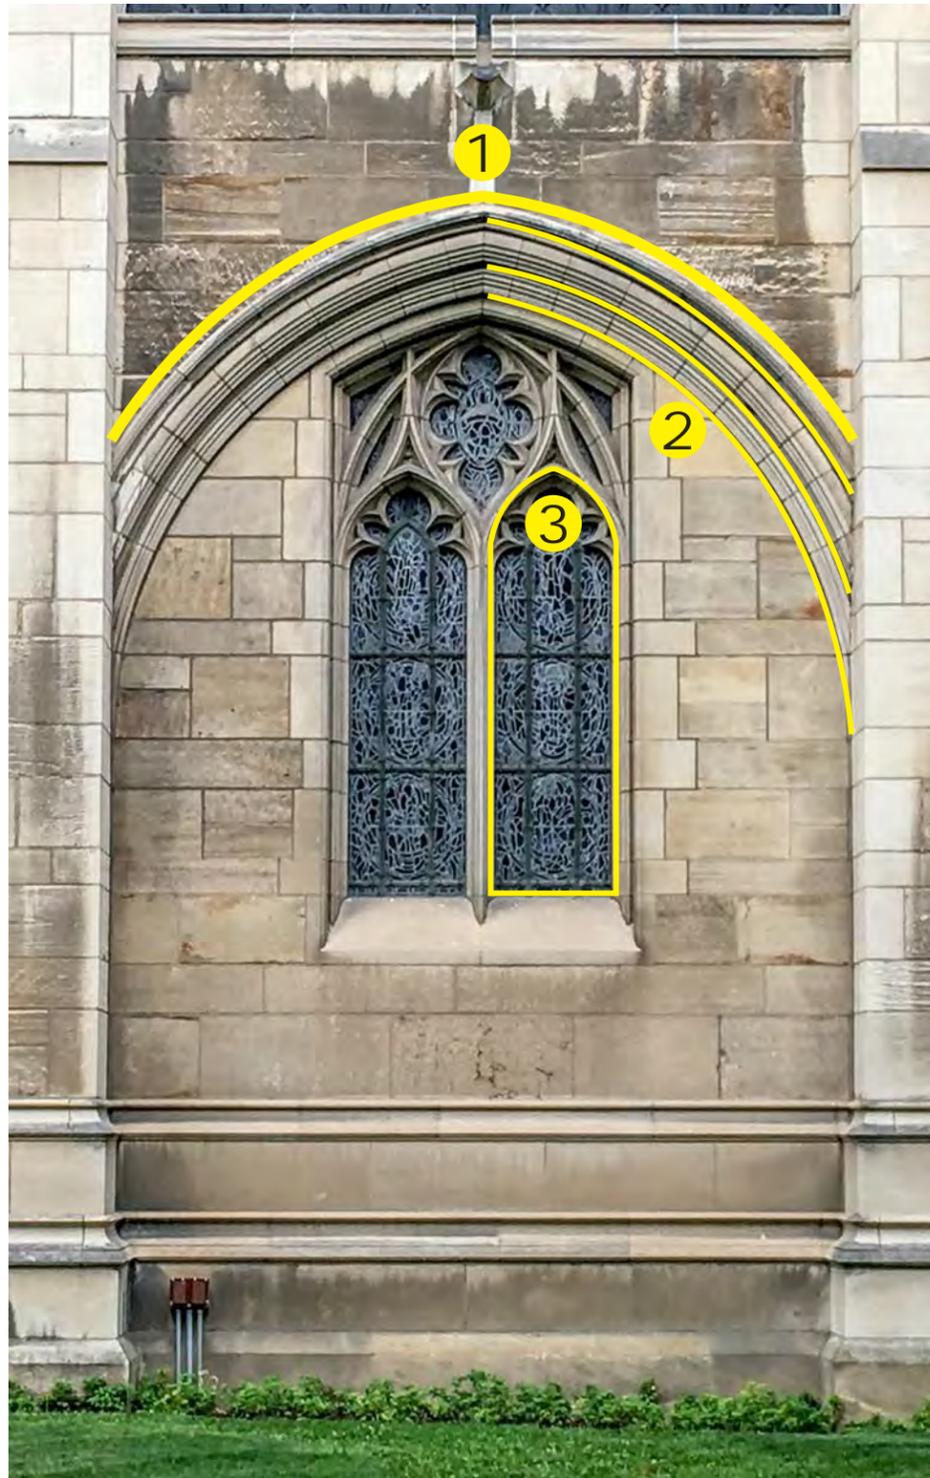

Pandhoff is the formal monastery garden of Cathedral Tower in Utrecht, Holland. Pandhoff features symmetrical parterre and a central octagonal fountain.

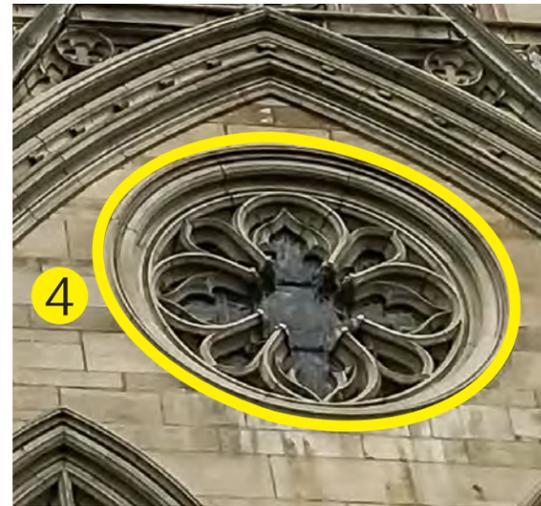

Royaumont Abbey, a Gothic abbey north of Paris, France, features a formal central garden with symmetrical parterre.

Heinz Chapel window arch

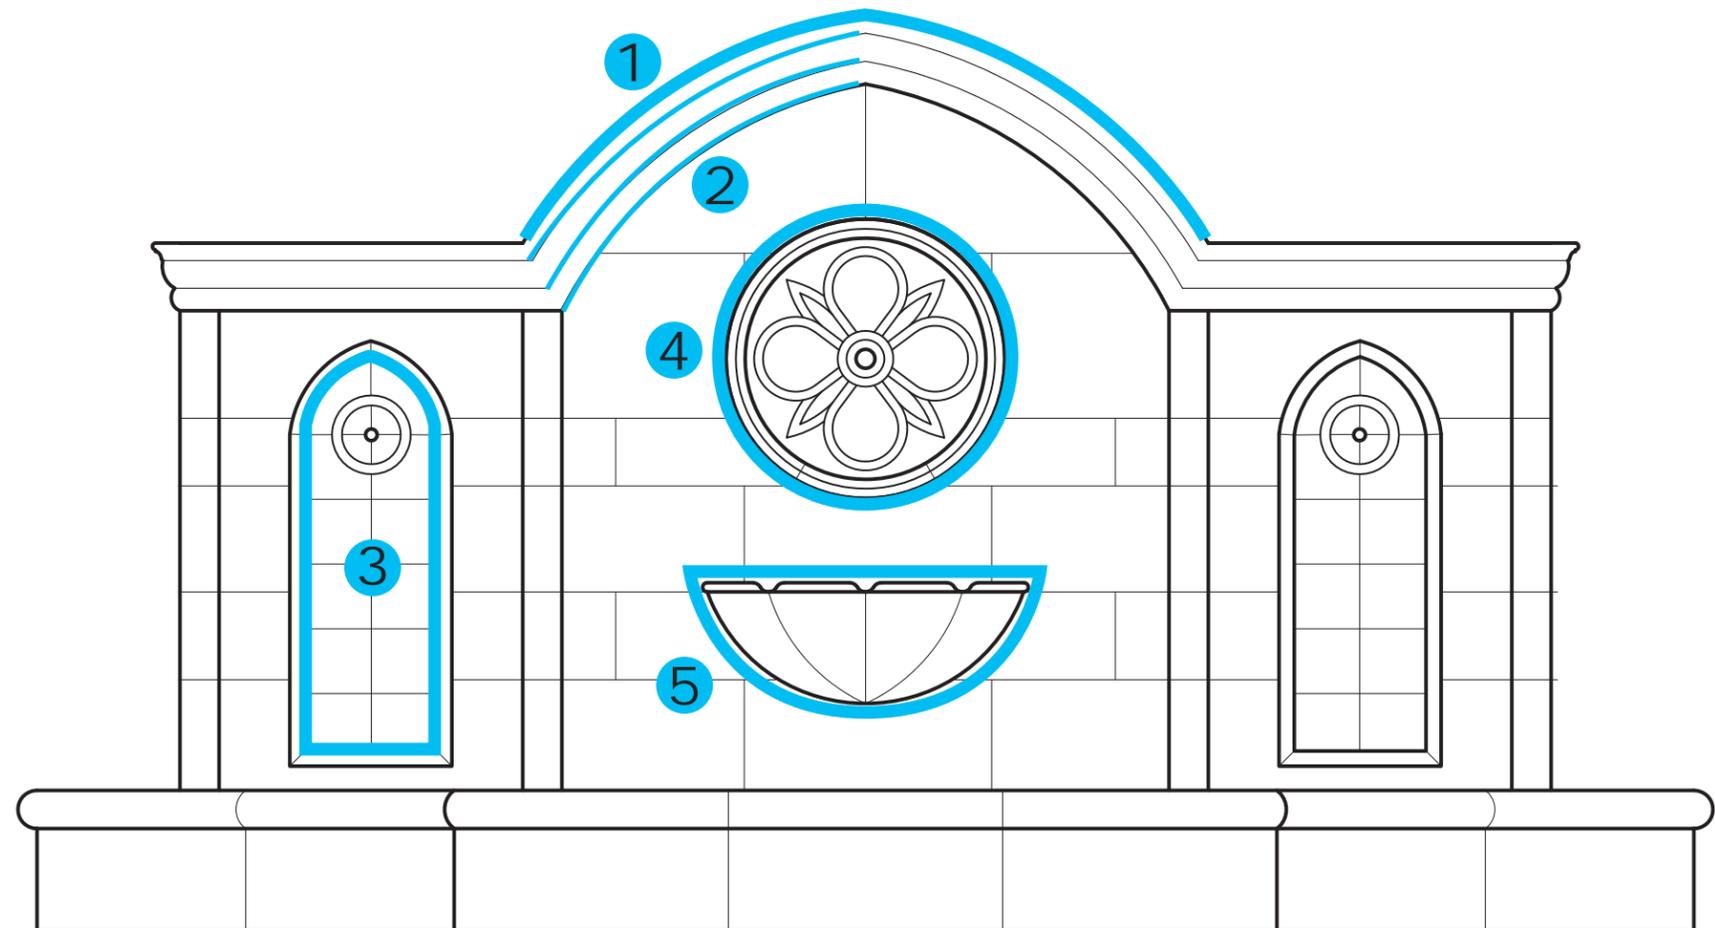

The rosette above the south transept windows

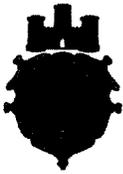

Fountain at the Cathedral of Learning

- 1 The central arch of the fountain is proportionally identical to the window arches
- 2 The top trim of the fountains is a simplified interpretation of the window arch trim that mimics the three major shadow lines that are apparent in the window arch trim.
- 3 The side arches are proportionally identical to the arch of the window border
- 4 The rosette at the center of the fountain is inspired by the rosette above the south transept windows.
- 5 The slotted fountain bowl is inspired by the fountain located at the south-west entrance of the Cathedral of Learning.
