200 Ross Street, Fourth Floor, Pittsburgh, PA 15219 phone 412.255.8996
Dear Art Commissioners,

The Department of Public Works, Architecture Division, Public Safety Facilities is respectfully submitting an application to the Art Commission, this is a letter of intent for the East Liberty Station cladding design located at 149 N Euclid in East Liberty.

In an effort to meet Pittsburgh’s 2030 Climate Action Plan goals, the building will undergo a major renovation adhering to the Net Zero Ready code recently adopted through City Council.

To that end, and due to the complexity of the building our Certified Passive House Consultant has helped us determine the most cost effective, and best method to achieve our Net Zero renovation goals. The roof has been recently upgraded to passive house roof, and the plan is to utilize an outside-in insulation method on the exterior. This involves adding insulation and a Passive House metal cladding system on the exterior facades.

Once the building is complete we hope to meet or exceed the 2030 climate action plan goals. We are also committed to doing a percent for an art project and that it will come for review at a later time.

I’m attaching an initial concept rendering of the metal wall panel system.

If you have any further questions please let us know.

Best Regards,

Claire Mastroberardino, Sr Project Manager.
Felipe Palomo, Project Manager
