Proposed scope for the Shadyside Connector

Oakland, Shadyside, East Liberty, East End, District 8 – A Shadyside Connection is included as part of the proposed bike network in the 2020 Bike(+) Plan for the City of Pittsburgh which will serve recreational and commuter cyclists.

Proposed bicycle infrastructure will expand existing facilities in the East End neighborhoods, and improve connectivity between Oakland, Shadyside, and East Liberty as well as to the Walnut Street and Ellsworth Ave business districts, schools, universities, parks, and religious institutions. Expanding the Shadyside bike network, one of the city's most biked networks, will improve road safety for all users.

Existing sharrows on Ellsworth Ave, the second most biked route in the city
