New Crosswalks, July 25, 2019

Beechview, District 4

Project intent is to enhance safety and streetscape along Beechview's primary business corridor (Broadway Avenue). Project includes new pavement markings, closing of existing "slip lanes" to allow more pedestrian / transit rider space, realignment of Beechview Ave, and a new plaza / expanded pedestrian space. Street concrete slab work was added to the project in late 2018 based on a request from Council District 4. The project is the result of several years of planning and public outreach.

Concrete slab work and pavement markings have been completed, as well as public art and concrete bollards at the former slip lane locations. The proposed plaza space design is upcoming.
