Irvine Street, Google Street View (2020)

The intent of this project is to provide a safe pedestrian connection along Irvine Street (SR-885) between Hazelwood Avenue and Greenfield Avenue, a desire of the neighboring communities. Sidewalk will be constructed on the east side of Irvine Street, with curb reconstruction incorporated into the project as budget allows. ADA ramps and driveways will be upgraded. Street tree plantings will be investigated.

At present, this project is only funded for design. DOMI is investigating potential sources for construction funds and will use design cost estimates to approach various funding opportunities.
