

# Semicir Street Landslide

## Perry North/26<sup>th</sup> Ward

An initial geotechnical investigation was completed in this area in June, 2010, due to earth movement. Additional geotechnical work was completed in January, 2019 as the earth movement continued. Some houses in this area have been demolished and still more of them have been condemned as a result of the landslide. Property acquisition was completed and utility concerns were resolved.

Semicir Street was opened to traffic on Thursday, April 15th. .
