South Side Slopes – 17 Ward

Oporto Street is an asphalt surfaced street in the South Side Slopes neighborhood that has experienced a landslide which caused the edge of the roadway to slide down the steep embankment. The street is currently closed between Shamokin and Huron Streets.

The geotechnical investigation is getting started. From the geotechnical investigation an option will be selected to advance toward final design. After the final design is completed, the project will be advertised, and a construction contract will be awarded. Project completion is expected to be in the summer of 2022.
