Mount Washington

Due to safety concerns, Platform 5 closed to pedestrians in April of this year after a precast concrete slab failed. Platforms 1 and 3 closed in June after a safety inspection uncovered similar deficiencies. The project will replace the precast concrete slabs and sidewalks, perform concrete repairs, and clean and paint the railings in the platform areas.

The \$700,000 reconstruction project of three elevated sidewalk platforms along Grandview Avenue in Mount Washington will take place in the area between Ulysses Street and Maple Terrace. The City's contractor, A. Merante Contracting, Inc., will perform the work. On site set up and construction is set to begin Wednesday, August 26, 2019 with an estimated completion date of November 27, 2019, weather permitting. Hours of operation will be Monday through Friday, 7:00 a.m. to 7:00 p.m. Pedestrians will be detoured to the opposite side of the street throughout construction.

There will be minimal lane disruption during construction. During certain times of the process, there may be temporary lane closures on P.J. McArdle Roadway to ensure the safety of travelers; these closures will be announced in advance.
