

# Semicir Street Landslide

## Perry North/26<sup>th</sup> Ward

An initial geotechnical investigation was completed in this area in June, 2010, due to earth movement. Additional geotechnical work was completed in January, 2019 as the earth movement continued. Some houses in this area have been demolished and still more of them have been condemned as a result of the landslide.

Currently, a 95% design submission has been received for the plans and specifications.

Acquisition of private property is necessary for this project

### Project Timeline

June, 2010 – initial geotechnical investigation completed

January, 2019 – additional geotechnical work completed

### Project Contact

Project Manager: Paul Loy

Title: Project Engineer
