

Cowley Playground Landslide

Troy Hill/Goettman Street

The landslide has occurred in the northeast corner of the Cowley Recreation Spray Park. The affected area is approximately 150' in length. It starts at the east end of an existing wall and ends near the City steps at Voskamp Street. A geotechnical investigation was conducted by American Geotechnical & Environmental Services, Inc. As part of the report, two alternative solutions have been explored.

Since it is in a park, a meeting between DOMI & DPW will occur to determine the next course of action. At that point, a final design will be advanced.

Project Timeline

April 2019 geotechnical investigation initiated

August 2019 Geotechnical Report submitted

Project Partners

Department of Public Works

Project Funding

Design - \$

Construction - \$ 900,000
