Central Lawrenceville Neighborway

**Project Timeline**
Winter 2019/2020 - Design
2020 – Construction

**Project Partners**
Healthy Ride, BikePgh

**Project Funding**
Design – In-house
Construction - TBD

**Funding Source**
Design – Operating
Construction – 2020 Capital Budget Final Mile

**Added Miles of Bike Network:** .75

**Questions?**
Email bikeped@pittsburgh.gov

**Central Lawrenceville, East End, District 7**
Neighborways are low-traffic streets that prioritize pedestrians, bicycles, and other non-vehicular traffic and offer a safer, more comfortable alternative to busy arterial streets. Neighborways typically run through residential neighborhoods and use context-appropriate traffic calming tools to keep speeds slow and safe for all users. They aim to connect neighborhoods and feature clear signs and pavement markings to help people easily navigate through Pittsburgh.

The Central Lawrenceville Neighborway will better connect people to Lower Lawrenceville and Upper Lawrenceville, while offering an alternative to the busy arterial Butler Street. The route will include bump-outs at intersections, wayfinding, a bike and pedestrian only path between 50th and 51st, and other traffic calming measures, where appropriate.
